PROFESSIONAL SUMMARY

BS Computer Science at Riphah International University (CGPA: 3.88/4.00) with hands-on experience in machine learning, data engineering, and full-stack development. Completed 3 industry internships across data science, data analytics, and full-stack development. Built and deployed end-to-end ML pipelines, MERN-based applications, and signal processing systems. Seeking a full-time role in Data Science, ML Engineering, or Full-Stack Development.

WORK EXPERIENCE

10Pearls | Data Science Intern

Dec 2025 – Feb 2026

- Built a serverless ML pipeline to forecast AQI (3-day horizon) using automated API data ingestion.
- Trained and evaluated Random Forest & Ridge regression models; tracked RMSE/R² metrics; managed features and models via Hopsworks feature store.
- Deployed a Streamlit application for real-time AQI predictions with SHAP-based model explainability.

Excelerate | Data Analyst Associate Intern

Sep 2025 – Oct 2025

- Validated and standardized Outreach, Applicant, and Campaign datasets using PostgreSQL.
- Performed data quality checks including record counts, duplicate detection, and business rule validation.
- Built Looker Studio dashboards to monitor KPIs including connectivity rates and agent performance.

Fauji Fertilizer Company (FFC) | BTT Development Team Intern

Jun 2025 – Jul 2025

- Contributed to a full-stack Employee Portal built with ASP.NET 8 Blazor and Entity Framework Core.
- Implemented Single Sign-On (SSO) and Multi-Factor Authentication (MFA) to strengthen enterprise security.
- Managed GitHub version control and handled IIS-based production deployment.

KEY PROJECTS

AQI Forecasting System

- End-to-end serverless ML pipeline with automated retraining, real-time prediction dashboard, and SHAP explainability.
- Stack: Python, Scikit-learn, Hopsworks, Streamlit, GitHub Actions.

Electrolyte Imbalance Detection (Final Year Project)

- MLP-based ECG signal analysis system for detecting electrolyte imbalances using AD8232 sensor with ESP32.
- Combines embedded hardware with deep learning for real-time biomedical signal classification.

Highland Escapes Travelers Website

- Full MERN stack tour and travel platform built and deployed end-to-end from development to production.
- Stack: MongoDB, Express.js, React.js, Node.js.
- <https://highlandescapestravelers.com/>

EDUCATION

Bachelor of Science in Computer Science

Sep 2022 – May 2026

Riphah International University, Islamabad | CGPA: 3.88 / 4.00

- Final Year Project: "Electrolytes Imbalance Detection using ECG Signals" - MLP + embedded hardware.

TECHNICAL SKILLS

Machine Learning & AI: Python, Scikit-learn, TensorFlow, PyTorch, CNNs, ANNs, LSTM, SHAP, LIME, EDA

Data Engineering: Hopsworks, AWS, PostgreSQL, MS SQL Server, MongoDB, SQL validation

Full-Stack Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), ASP.NET 8 Blazor, Entity Framework Core

DevOps & Tools: GitHub Actions, Git, IIS Deployment, Linux, Streamlit, Flask, FastAPI, Looker Studio

Programming Languages: Python, JavaScript, C++, Java (OOP), PHP, Assembly Language
